Introduction

This Financial Supports Catalogue was written to help employers identify financial support options in their region and industry. The catalogue may be used on its own or alongside BHER's [How to Calculate Your ROI: A Step by Step Guide](#), which supports employers through the process of calculating ROI. Regardless, financial supports received from the government and other organizations can help reduce the cost of your organization's WIL program.

There are numerous types of WIL programs and initiatives. Within this catalogue, WIL programs include, but are not limited to, the following:

- Apprenticeships
- Co-ops
- Internships
- Professional practice arrangements
- Field experiences
- Applied research projects
- Service learning
- Entrepreneurships
- Work experiences
- Emerging WIL models such as competitions, hackathons, events, and micro-placements

The information in this catalogue is intended to support employers in the early stages of searching for financial assistance for their WIL program. It is based on funding pages on publicly available government and industry websites. Please click through to the websites to obtain more information about each source of funding.

National Supports

GOVERNMENTAL SUPPORTS

Overview

The federal government offers financial supports in the form of wage subsidies, tax credits, and grants. The following sections organize financial supports based on industry and type of WIL.

Arts, Entertainment and Recreation

GOVERNMENT OF CANADA	
PROGRAM NAME	Young Canada Works; Young Canada Works at Building Careers in Heritage Organizations; Young Canada Works at Building Careers in English and French; Young Canada Works in Heritage Organizations; Young Canada Works in both Official Languages.
CATEGORY	Structured work experiences
TARGET EMPLOYERS	Industry experts (CEOs, executives, managers, etc.)
AUDIENCE	Employers from a private, public, or non-profit organizations with opportunities to build advanced skills through internships

Governmental Organizations For Funding Opportunities

Employment and Social Development Canada

<https://www.canada.ca/en/employment-social-development.html>

Methodology

This analysis was conducted by looking at federal and provincial government websites, industry association websites, and non-profit organization websites. Most financial supports are offered by either the federal and provincial government and are advertised through government websites, industry associations, and organizations.

For the purpose of this catalogue, we divided the WIL types into three main funding categories, including: apprenticeships, structured work experiences (work experiences, internships, field experience, co-ops, mandatory professional practice, micro placements), and general (any WIL type). The funding programs related to structured work experiences are broader than this term would imply, since some programs include institutional partnerships and/or other types of WIL alongside co-ops, for instance. Apprenticeship related funding programs are presented on their own because their scope does not typically include structured work experiences or other types of WIL in Canada. The general funding programs may be applicable to multiple types of WIL, though we recommend contacting the funding agencies directly to clarify the scope and purpose of these opportunities.

Please note that the Financial Supports Catalogue is updated on a periodic basis, with the last update in September 2021. Please note that not every funding source is included in this catalogue.

Key Terms

Underrepresented Groups: women, persons with disabilities, members of visible minorities, and Indigenous students.
